Mulfingen, Landshut 21.11.2011,
ebm-papst is investing in a new logistics centre in Landshut. In the direct vicinity of the present location, a high-bay warehouse is to be constructed on a surface area of around 5,000 square metres by 2013.

"With this investment, we are setting the foundations for further growth at ebm-papst Landshut, thus ensuring the future viability of the location", said Hans-Jochen Beilke, Chairman of the Board of Directors of the ebm-papst Group.

The Bavarian subsidiary specialises in the development and production of fans, small motors and pumps for energy-efficient heating and household appliance technology. The company has been part of the ebm-papst Group with headquarters in Mulfingen (Baden-Württemberg) since 1997.

The logistics areas at the present location that will be freed up by the new building are to be used for an extension of production, explains Stefan Brandl, Managing Director at ebm-papst Landshut. "We are continually developing towards becoming a system supplier, and for this purpose we urgently need additional space", said Brandl.
