

## Building Connect

### *Cloud based tools and metrics*

**ebmpapst**

engineering a better life

# Transform your building with data

ebmpapst's Smart Building Management tool is a cloud-native solution that gathers data from existing assets, analyzes, and turns them into value creating actions.

Contact us to learn how this solution can help you reduce equipment run times and use data to optimize the performance of your building to save energy and reduce waste. Combining your building's system with the world of data opens the door to even more added value.

engineering a better life

# Transform your building with data

*Our cloud-native solution gathers data from existing assets, analyzes, and turns them into value creating actions. The platform takes user behavior, building characteristics and environmental conditions to create an optimized indoor ecosystem.*
