The ebm-papst solution

A smart building system for existing commercial facilities that helps increase comfort and reduce energy costs, while enabling you to monitor and manage your building from any web-enabled device.

Energy utilities make up about 70% of average building's operating costs, meaning that energy efficiency is a financial as well as an environmental benefit

Let us prove
how ebm-papst
can help you
*save time,
money and
energy!*

ebm-papst capabilities

CONNECT

ebm-papst connects, standardizes, and translates between various protocols, systems, and equipment to enable total secure integration and management with ease.

COLLECT

ebm-papst collects real time and historic data from sensors, meters, equipment, weather, and geospatial data to develop predictions and insights never before possible.

ANALYZE

ebm-papst visually transforms collected data into easily readable graphs and reports, making management decisions even easier.

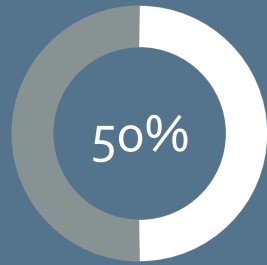

OPTIMIZE

ebm-papst not only monitors and measures, but optimizes facility operations in real-time to produce unprecedented energy savings of up to 70%.

The problem

TIME, MONEY, AND ENERGY WASTE

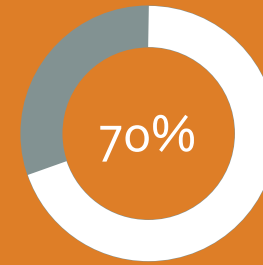

- Actual usage
- Energy waste

Commercial buildings waste up to 50% of total energy used

- outdated systems
- limited capabilities
- lack of management
- inability to adjust to real time
- existing solutions are expensive and/or complicated to install

The ebm-papst

SOLUTION

- Used energy
- Saved energy

Our secure solution can save you up to 70% of energy

- full integration of systems
- universally compatible
- user-friendly web platform
- smart predictive controls
- affordable & quick payback
- plug and play installation

Other applications

ebm-papst's solutions are widely applicable in the arenas of energy, automation, agriculture, building management, and more! Contact us for more details.
