

Handheld Programmer

for Energy Saving Motor (ESM) based products

ebmpapst

The engineer's choice

ESM Programmer by ebm-papst

Easy speed and operating mode programming
Battery operated
User-friendly navigation menu
Protective boot with kickstand

Features and Benefits

Makes quick work of programming the two ESM selectable operating speeds
Select for manual or automatic speed or rotation changes and timing
One-click programming of consecutive fans to same speed and operation mode
Good for production line or field service use
Automatic shut-off function for an extended battery life
Mini-USB connection for uploading free software upgrades
Batteries, programming cable and operating manual included

Compatibility

This programmer is compatible with most ESM-based fans that are listed in the ebm-papst 10-2012 "Energy-Saving Fans" catalog.

Note: The 24 VDC W1G200-EC, ACi4400 and iQ motor series that are included in this catalog are not programmable and the programmer is not compatible with the ebm-papst motors with MODBUS interfaces or with ebmBUS interfaces. Some customized ESM motors and fans exist that are not programmable.
