ebm-papst offers solutions for medical technology

System solutions for medical technology

COMPAMED 2016 – High-Tech Solutions for Medical Technology is an international meeting point for manufacturers involved in medical preproduction. ebm-papst St. Georgen GmbH & Co. KG and ebm-papst Zeitlauf GmbH & Co. KG will be presenting their products and medical technology applications in Düsseldorf between 14 - 17/11/2016 in Hall 08b, stand H27.

One of the demands placed on medical technology is that even the most complex devices have to be produced with the smallest dimensions possible. Designing an optimal system solution requires special skills in the field of air and drive technology: compact, effective technology will always generate waste heat in need of dispersement, regardless of its efficiency rating. This is where high-performance, efficient and low-noise ventilators come into play, but they must feature a long service life. Small, powerful and efficient drive systems offering the utmost in maneuverability and controllability must also form part of the equation. The majority of applications in medical technology would be virtually inconceivable without these highly useful devices.

As a world leader in air and drive technology and a development partner, ebm-papst develops a variety of high-tech solutions for medical technology applications. Motors, electronics, gears and sensors: our modular kits can be combined in a range of different ways. ebm-papst will be presenting efficient, compact and dynamic system solutions for medical technology at COMPAMED.

About ebm-papst

The ebm-papst Group is the world's leading manufacturer of fans and motors. Since it was founded, the technology company has continuously set global market standards. Developments have ranged from electronically controlled EC fans, through aerodynamic improvements of fan blades, and on to the resource-conserving selection of materials, with sustainable materials being just one option.

In fiscal year 2015/16, the company achieved sales of almost €1.7 billion. ebm-papst employs approximately 12,500 people at 18 production sites (in Germany, China, the United
