

ebm-papst wins German Sustainability Award Products 2026 with its oil-free turbo compressor CompaNamic

Mulfingen, November 5, 2025 - The ebm-papst Group, the world's leading manufacturer of fans and motors, received the German Sustainability Award Products 2026. The award was given to the turbo compressor CompaNamic in the "Climate" transformation field.

According to the jury, CompaNamic significantly ensures the efficiency and resource-saving operation of heat pumps and refrigeration systems. As a central component in heating and cooling technology, CompaNamic can make a significant contribution to energy savings, climate protection, and the circular economy. The jury was also impressed by the product's holistic impact throughout its entire life cycle. The turbo compressor operates completely free of oil, uses the natural refrigerant propane, and does not contain any harmful PFAS compounds. This not only increases energy efficiency but also simplifies disposal at the end of the systems' service life.

"This award confirms the success of our 'Innovation for Growth' strategy. It encourages us to continue this path and demonstrates how our disruptive technologies actively contribute to a better future," said Prof. Dr.-Ing. Tomas Smetana, CTO of the ebm-papst Group, about winning the award. "I would like to thank the highly motivated, creative, and focused team that drives our mission of innovation-driven growth in harmony with sustainability every day with passion!"

Last year, ebm-papst impressed the jury as a company in the "Motors and Turbines" category and won the German Sustainability Award again after 2013.

About ebm-papst

The ebm-papst Group, a family-run company headquartered in Mulfingen, Germany, is the world's leading manufacturer of fans and motors. Since it was founded in 1963, the technological leader has set international industry standards with its core competencies in motor technology, electronics, digitalization, and aerodynamics.

ebm-papst offers sustainable, intelligent, and tailor-made solutions for virtually every requirement in ventilation and heating technology. ebm-papst sets the benchmark in almost all sectors, such as ventilation, air conditioning and refrigeration technology, heating technology, information technology, mechanical engineering, and medical technology.

In the 2024/25 financial year, the ebm-papst Group generated a turnover of 2.1 billion euros. It employs just around 13,500 people at 30 production sites, including in Germany, China, and the U.S., as well as 50 sales offices worldwide.
