

News from ebm-papst

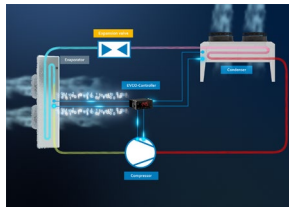

1. AxiBlade.S.Perform and AxiBlade.S

For chillers, condensers, and recoolers, ebm-papst is expanding the AxiBlade series with new models in 1030 mm and 1250 mm. They are designed for high cooling capacity combined with high efficiency and low noise emissions.

2. Defrost on Demand

Defrost on Demand enables refrigeration systems to defrost as needed based on operating data from EC fans and reduces unnecessary defrost cycles.

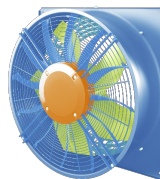

3. Energy efficiency guarantee

With an energy efficiency guarantee, ebm-papst is enhancing its NEXAIRA.Fit retrofit solution and ensuring projected energy savings in existing HVAC systems.

4. ErP Fan Regulation *

With ErP 2026, the European Union significantly tightened the requirements for fans starting in July. New efficiency limits, revised evaluation methods, and expanded documentation requirements affect not only fan manufacturers but also OEMs, plant engineers, and operators. ebm-papst provides information on the most important changes and explains what users should be prepared for now.

News from ebm-papst

5. RadiFlow 630*

For applications in HVAC and data center cooling, the RadiFlow 630 combines high airflow with improved efficiency and a compact design.

6. Retrofit Deutsche Messe AG

A retrofit project by Deutsche Messe AG demonstrates how existing ventilation systems can be modernized to be more energy-efficient and digitally connected.

7. Retrofit Rathauscenter Pankow

A retrofit project at the Rathaus-Center Pankow demonstrates how existing HVAC systems can be modernized to be more energy-efficient without the need for costly new construction.

8. Retrofit Mayr Miesbach printing plant

A real-world project at the Mayr Miesbach printing plant demonstrates how a retrofit can achieve a precise indoor climate and greater energy efficiency.
