

## Press release

### Product Launch: ebm-papst A&NZ BACnet Gateway Generation II

The BACnet Gateway Generation II provides enhanced communication between ebm-papst EC fans with MODBUS protocol and BACnet BMS controlled facilities. The new generation improves on functionality, connectivity and user experience. The BACnet Gateway Generation II is BACnet Protocol Implementation Compliant.

The new Gateway can connect up to 18 ebm-papst EC fans with MODBUS capability and allows integration with BACnet BMS via either TCP/IP or MS/TP RS485 built-in communication portals. The new Gateway is designed for BMS monitoring but can also be used for high-level BMS fan speed control.

The built-in display can be used to customise communication settings without additional devices. The new Gateway displays fan status, fan speed, fan input power and other fan parameters.

The new Gateway also has the capability to digitally output fan errors and warnings, which can be connected to alarms in the system.

The BACnet Gateway Generation II is now available ex stock from Melbourne.
