## Preventive measures / risk areas

**ebmpapst**

the engineer's choice

The coronavirus is spreading more and more and further cases of infection are also becoming known in Germany.

We take the current situation concerning the coronavirus very seriously and ask you to observe our precautionary measures:

### For visitors:

In order to keep the risk of possible infection low, we have decided to postpone all personal meetings with suppliers, customers and visitors who have been in risk areas\* in the last 21 days and replace them with telephone or video conferences.

### For employees:

If you have been in a coronavirus risk area within the last 14 days, you are not allowed to enter the company area.

Please contact your manager or the HR department immediately by telephone to coordinate further action.

We ask you - also in your own interest - for your understanding for the above-mentioned precautionary measures.

\* Risk areas are currently individual provinces in China, Italy, Iran and South Korea. You will receive regular updates on the website of the Robert Koch Institute: [https://www.rki.de/DE/Content/InfAZ/N/Neuartiges\\_Coronavirus/Risikogebiete.html](https://www.rki.de/DE/Content/InfAZ/N/Neuartiges_Coronavirus/Risikogebiete.html)
