Rational AG relies on GreenTech EC technology from ebm-papst

Award for “Supplier of the Year”

In June 2016, ebm-papst was designated “Supplier of the Year” for the first time by Rational AG of Landsberg in Bavaria. It received positive ratings for quality, innovation and technology in particular, as well as for competitiveness and logistics. The two companies have had a successful business relationship for over ten years; ebm-papst was previously designated a premium supplier by Rational AG twice, in 2012 and 2015.

Rational AG is the world market leader in the combi steamer segment for the thermal preparation of food in restaurants, professional kitchens, store chains and catering businesses. Motors from ebm-papst with GreenTech EC technology ensure optimum air circulation in the cooking chamber. The smoothly adjustable EC motors can be operated at any speed and change their direction of rotation frequently for increased turbulence without additional circulation aids and more uniform cooking results.

Fig. 1: Peter Wiedemann, Chief Technical Officer of Rational AG, presents the certificate to Alfred Müller, Head of Domestic Sales at ebm-papst.

About ebm-papst

The ebm-papst Group is the world's leading manufacturer of fans and motors. Since it was founded, the technology company has continuously set global market standards. Developments have ranged from electronically controlled EC fans, through aerodynamic improvements of fan blades, and on to the resource-conserving selection of materials, with sustainable materials being just one option.

In fiscal year 2015/16, the company achieved sales of almost €1.7 billion. ebm-papst employs approximately 12,500 people at 18 production sites (in Germany, China, the United States and elsewhere) and in 57 sales offices worldwide. Fans and motors from the global market leader can be found in many industries, including ventilation, air conditioning and refrigeration, household appliances, heating, automobiles and drive engineering.
