Apprenticeships successfully completed at ebm-papst

St. Georgen,

From mechatronics engineers to IT clerks and industrial mechanics – 8 very pleased apprentices recently celebrated the successful completion of their vocational training at the fan and engine manufacturer ebm-papst in St. Georgen. The following trainees received their testimonials and certificates during a celebratory ceremony: Sandro Schwer (industrial mechanic), Alexander Fleig (mechatronics engineer), Marvin Scholz (electronics technician for devices and systems), Aylin Peynirci (industrial clerk), Fabian Mayer (IT clerk), Raffael Ganter (mechatronics engineer) und Pascal Bösinger (electronics technician for devices and systems). They were pleased to have completed their training and looked forward to starting their professional life. The testimonials and certificates were handed over by Wolfgang Beyer (HR Manager), Iris Steidinger (Commercial Apprenticeship Trainer) and Hansjörg Kaltenbrunner (Training Manager) together with a small gift.

HR Manager Wolfgang Beyer commented: “We are delighted that we have once again successfully completed training more specialists this year. Well-trained employees are a success factor for the sustainable success of a company.” He also praised the high degree of commitment and competence of the trainers, who made a major contribution to this success. ebm-papst is regarded as a model company for training in the region – and for good cause. For the trainees, completion of their apprenticeships marks the beginning of a new and interesting phase in their lives, as well as the possibility of further development in their profession.

In addition to the certificates, two trainees received a special distinction from the IHK (the German Chamber of Industry and Commerce) for good performance. Mr Schwer received a prize and Mr Bösinger received a commendation. The apprentices thanked their trainers for their wonderful time as apprentices and for the years of instruction they received.

At ebm-papst, there are currently 37 apprentices undergoing vocational training at the St. Georgen site – 21 in the industrial and technical field, 9 in the commercial field and 7 in an integrated degree program. All apprenticeship vacancies have already been filled for the training year commencing in September. The application phase for apprenticeships for 2018 is currently under way.

Apprenticeships successfully completed at ebm-papst

About ebm-papst

The ebm-papst Group is the world's leading manufacturer of fans and motors. Since it was founded, the technology company has continuously set global market standards.

Developments have ranged from electronically controlled EC fans, through aerodynamic improvements of fan blades, on to the resource-conserving selection of materials, with sustainable materials being just one option.

In fiscal year 2015/16, the company achieved sales of almost €1.7 billion. ebm-papst employs approximately 13,000 people at 25 production sites (in Germany, China, the United States and elsewhere) and in 49 sales offices worldwide. Fans and motors from the global market leader can be found in many industries, including ventilation, air conditioning and refrigeration, household appliances, heating, automobiles and drive engineering.

About ebm-papst St. Georgen:

ebm-papst St. Georgen, subsidiary of the ebm-papst group of companies in Muldingen, Germany is known as a global pioneer and trend setter in the field of compact fans and drive engineering. The Black Forest-based company supplies intelligent solutions for a variety of sectors such as automobiles, rail technology, internal logistics, electronics and medical technology. The Herbolzheim plant is the technology center for the automobile industry. The drive specialist and subsidiary, ebm-papst Zeitlauf, based in Lauf in south-east Germany, supplies planetary, spur and angle gearheads. Turnover in the 2015/16 financial year totaled around € 336m. ebm-papst St. Georgen employs over 1,460 members of staff in Germany.
