Mulfingen, St. Georgen

The ebm-papst Group, world market leader for fans and motors (€1.9 billion revenue/14,000 employees) whose headquarters is in Mulfingen, has completed the second construction phase of its production facility (€15 million investment) in the St. Georgen-Hagenmoos commercial zone. After a construction phase of approximately 16 months, the facility was inaugurated as part of two company anniversary celebrations.

On a total area of 15,000 m<sup>2</sup>, the technology leader will produce thousands of motors and electronic assemblies for industrial drive engineering. The expansion also created space for Logistics and Administration.

“The fact that each of our investments remains local is an expression of our commitment to both the region and Germany,” said Stefan Brandl, Chairman of the Board of Directors of ebm-papst Group. “With the factory expansion, we are increasing the production capacity we require for our Automotive and Drive Engineering divisions.”

The new building’s highlight is a modern energy concept that seamlessly follows the environmental and sustainability goals that have guided ebm-papst for years. For example, two ice storages with a total volumetric capacity of 500 m<sup>3</sup> are the central sources of heat and cold. This concept achieves carbon savings of 63% compared to conventional energy concepts.

Seventy-five years ago, innovative inventor Hermann Papst founded the Papst company, which became one of the most important motor manufacturers for the HiFi and office devices sectors. Since 1992 – for 25 years – ebm-papst St. Georgen has been an important pillar of the ebm-papst Group.

#### **About ebm-papst:**

The ebm-papst Group is the world's leading manufacturer of fans and motors. Since it was founded, the technology company has continuously set global industry standards: from the digital interconnection of electronically controlled EC fans to aerodynamic improvements for fan blades to the use of eco-friendly materials. In fiscal year 2016/17, the company achieved sales of almost €1.9 billion. ebm-papst employs over 14,000 people at 26 production sites (e.g. in Germany, China and the US) and in 49 sales offices worldwide. Fans and motors from the world market leader are used in many industries, including ventilation, air conditioning and refrigeration, household appliances, heating, automotive and drive engineering.
