

Press Release

ebm-papst at fan2018 in April in Darmstadt, Germany

Aerodynamics experts for fans meet and network

The “fan2018” conference will be held in Darmstadt, Germany from April 18-20, 2018. This three-day forum, which is now being held for the third time, is the only event in the world that focuses exclusively on air flows and ventilation systems.

The development of fans is always faced with demands for greater and greater efficiency, while keeping noise levels as low as possible. The key topics at the international conference will be noise behavior in fans and aerodynamics, and applications and systems with fans. About 300 visitors from 30 countries are expected at the three-day event, which will be held entirely in English.

Engineers from the leading fan manufacturers and academic staff from the most significant universities in this field will be attending the conference. Experts from ebm-papst in Mulfingen and St. Georgen will be holding presentations on a total of five topics.

The Technical University Darmstadt and the University of Siegen, among others, are co-organizing the event, and ebm-papst is a member of the organizing committee. Other supporters include the VDMA and Eurovent. It is still possible to register as a sponsor for the conference. Information is available at www.fan2018.org.

Please register at <http://www.fan2018.org/gb/registration.html>.

About ebm-papst

The ebm-papst Group is the world's leading manufacturer of fans and motors. Since it was founded, the technology company has continuously set global industry standards: from the digital interconnection of electronically controlled EC fans to aerodynamic improvements for fan blades to the use of eco-friendly materials.

In fiscal year 2016/17, the company achieved sales of almost €1.9 billion. ebm-papst employs over 14,000 people at 26 production sites (e.g. in Germany, China and the US) and in 49 sales offices worldwide. Fans and motors from the world market leader are used in many industries, including ventilation, air conditioning and refrigeration, household appliances, heating, automotive and drive engineering.
